

### **Supply Chain Director**

Develop and implement the long term supply chain strategies and networks for a leading defense industry supplier. Our client, based in the Orange County, CA area, is a well-established company, and part of a publicly traded parent company. The local company designs critical test instrumentation and tracking systems, and is a leader in Global Positioning Systems (GPS) and services for military and industrial applications. The **Supply Chain Director (SCD)** develops company wide supply chain strategies by monitoring key performance indicators and establishing strong collaborative partnerships with both suppliers and other functions.

The mission of the **SCD** is to provide strategic leadership to ensure the success of all aspects of the company's Supply Chain. Your key objectives will be to:

- Lead the migration of all supply chain processes to the common ERP platform.
- Provide Leadership to document and continuously improve supply chain processes using Lean-Six Sigma methodologies.
- Develop and implement robust Sales & Operations planning processes.
- Develop sourcing strategies, solicit/analyze request for proposals, negotiate contracts, and coordinate supplier integration plan with internal client.
- Partner with quality organization to establish a supplier relationship management process with continuous improvement goals/programs.
- Manage/Direct Supply Chain personnel in the evaluation and selection of qualified suppliers; take supplier quality, cost, and responsiveness/reliability into consideration.
- Establish/Evaluate clear performance objectives for all direct reports and provide annual performance goals and training plans for development of succession planning and career development.

**Background and Experience:** The ideal candidate will have most of these:

- BA/BS in Business Administration, Engineering, or Operations Management required, MBA and APICS certification preferred.
- Minimum 10 years experience in supply chain management, with at least 5 years supporting DoD/Government Contracts.
- Demonstrated application of Lean/Six Sigma methodologies applied to complex supply chains.
- Extensive knowledge of MRP systems and Federal Acquisition Regulations (FAR).
- **Secret Clearance required.**

If you are an effective communicator, results-oriented, highly customer focused, and can work well in a team approach, we'd like to hear from you. Excellent compensation program and benefits available.
