

### **Construction Defect Practice Leader**

Lead and manage the construction defect practice on a national level for this industry leader in surety claim and construction defect consulting. Reinvigorate the existing construction defect practice and take it to the next level – build a world class construction defect practice.

#### **As the Construction Defect Practice Leader your key objectives will be:**

- **Build Construction Defect Practice:** Stabilize, strengthen, invigorate, grow and manage the company’s construction defect practice.
- **Business Development:** Engage in networking among referrers of construction defect projects, to find upcoming opportunities for the company, and to present the company’s capabilities.
- **Manage Projects:** Utilize a matrixed national pool of talent available within the company to manage a wide range and type of claims, construction issues and projects.
- **Systems and Infrastructure:** Develop and implement systems and processes for managing construction defect assignments and deploying such projects to the company’s regional offices across the nation.
- **Client Output:** Provide clients with exceptional service via litigation support, depositions, and expert testimony, along with complete and accurate report writing.

#### **Background and Experience:**

The ideal candidate will have the following education, work history, knowledge and skills.

**Education:** Bachelor’s Degree in Civil or related Engineering, Construction Management, Construction Technology or a similar discipline. Licensed P.E. (Professional Engineer) in California required. The ideal candidate will likely have additional credentials and certifications that will lend to his or her credibility with clients.

#### **Skills and Experience:**

- 10+ years of experience in construction management and consulting with some focus on construction defect consulting.
- Broad base of experience in dealing with a variety of different projects, including commercial, industrial, residential (housing tracts, apartments, etc.), hospitality, hospitals, public works, power plants, roads, bridges, etc. High rise construction experience is required.
- Experienced construction engineer with history in bidding and estimating, project management, scheduling, and providing litigation support. Must have experience in providing expert testimony.
- Must have excellent writing skills due to frequent report writing.
- Must have excellent verbal communication skills for client presentations, negotiations, depositions, testimony, etc.
- Prior experience in business development is important. The company is seeking a “Sell/Do” type of manager.

If you are a confident, self-motivated, results-oriented leader who can drive a sense of urgency through an organization, we’d like to hear from you. Excellent compensation and benefits provided.
